All Research Critique uses a variety of methods to ensure the highest quality of respondent data, including:

Proxy & Browser Detection

We make database calls at multiple points of execution, from registration through survey entries and exits, to confirm IP and browser specific identifying information.

IP Geofencing:

Our servers locate the registrant's country location through his/her IP address and determines their eligibility for registration based on country specific rules.

Postal Address Verification:

We verify the registrant's postal address and zip/postal code from a current local address directory.

Email Address Verification:

This is checked through our database to ensure the email address is unique (all registrants must verify their email address through a double opt-in registration process)

Research the audience

The Panelist are effectively and actively enlisted through various stations, for example, telephone campaigns, online and print advertisements, recommendations, PR, etc.

When they have enrolled for the board they are getting fitting overviews by means of email or portable application straightforwardly on their cell phone.

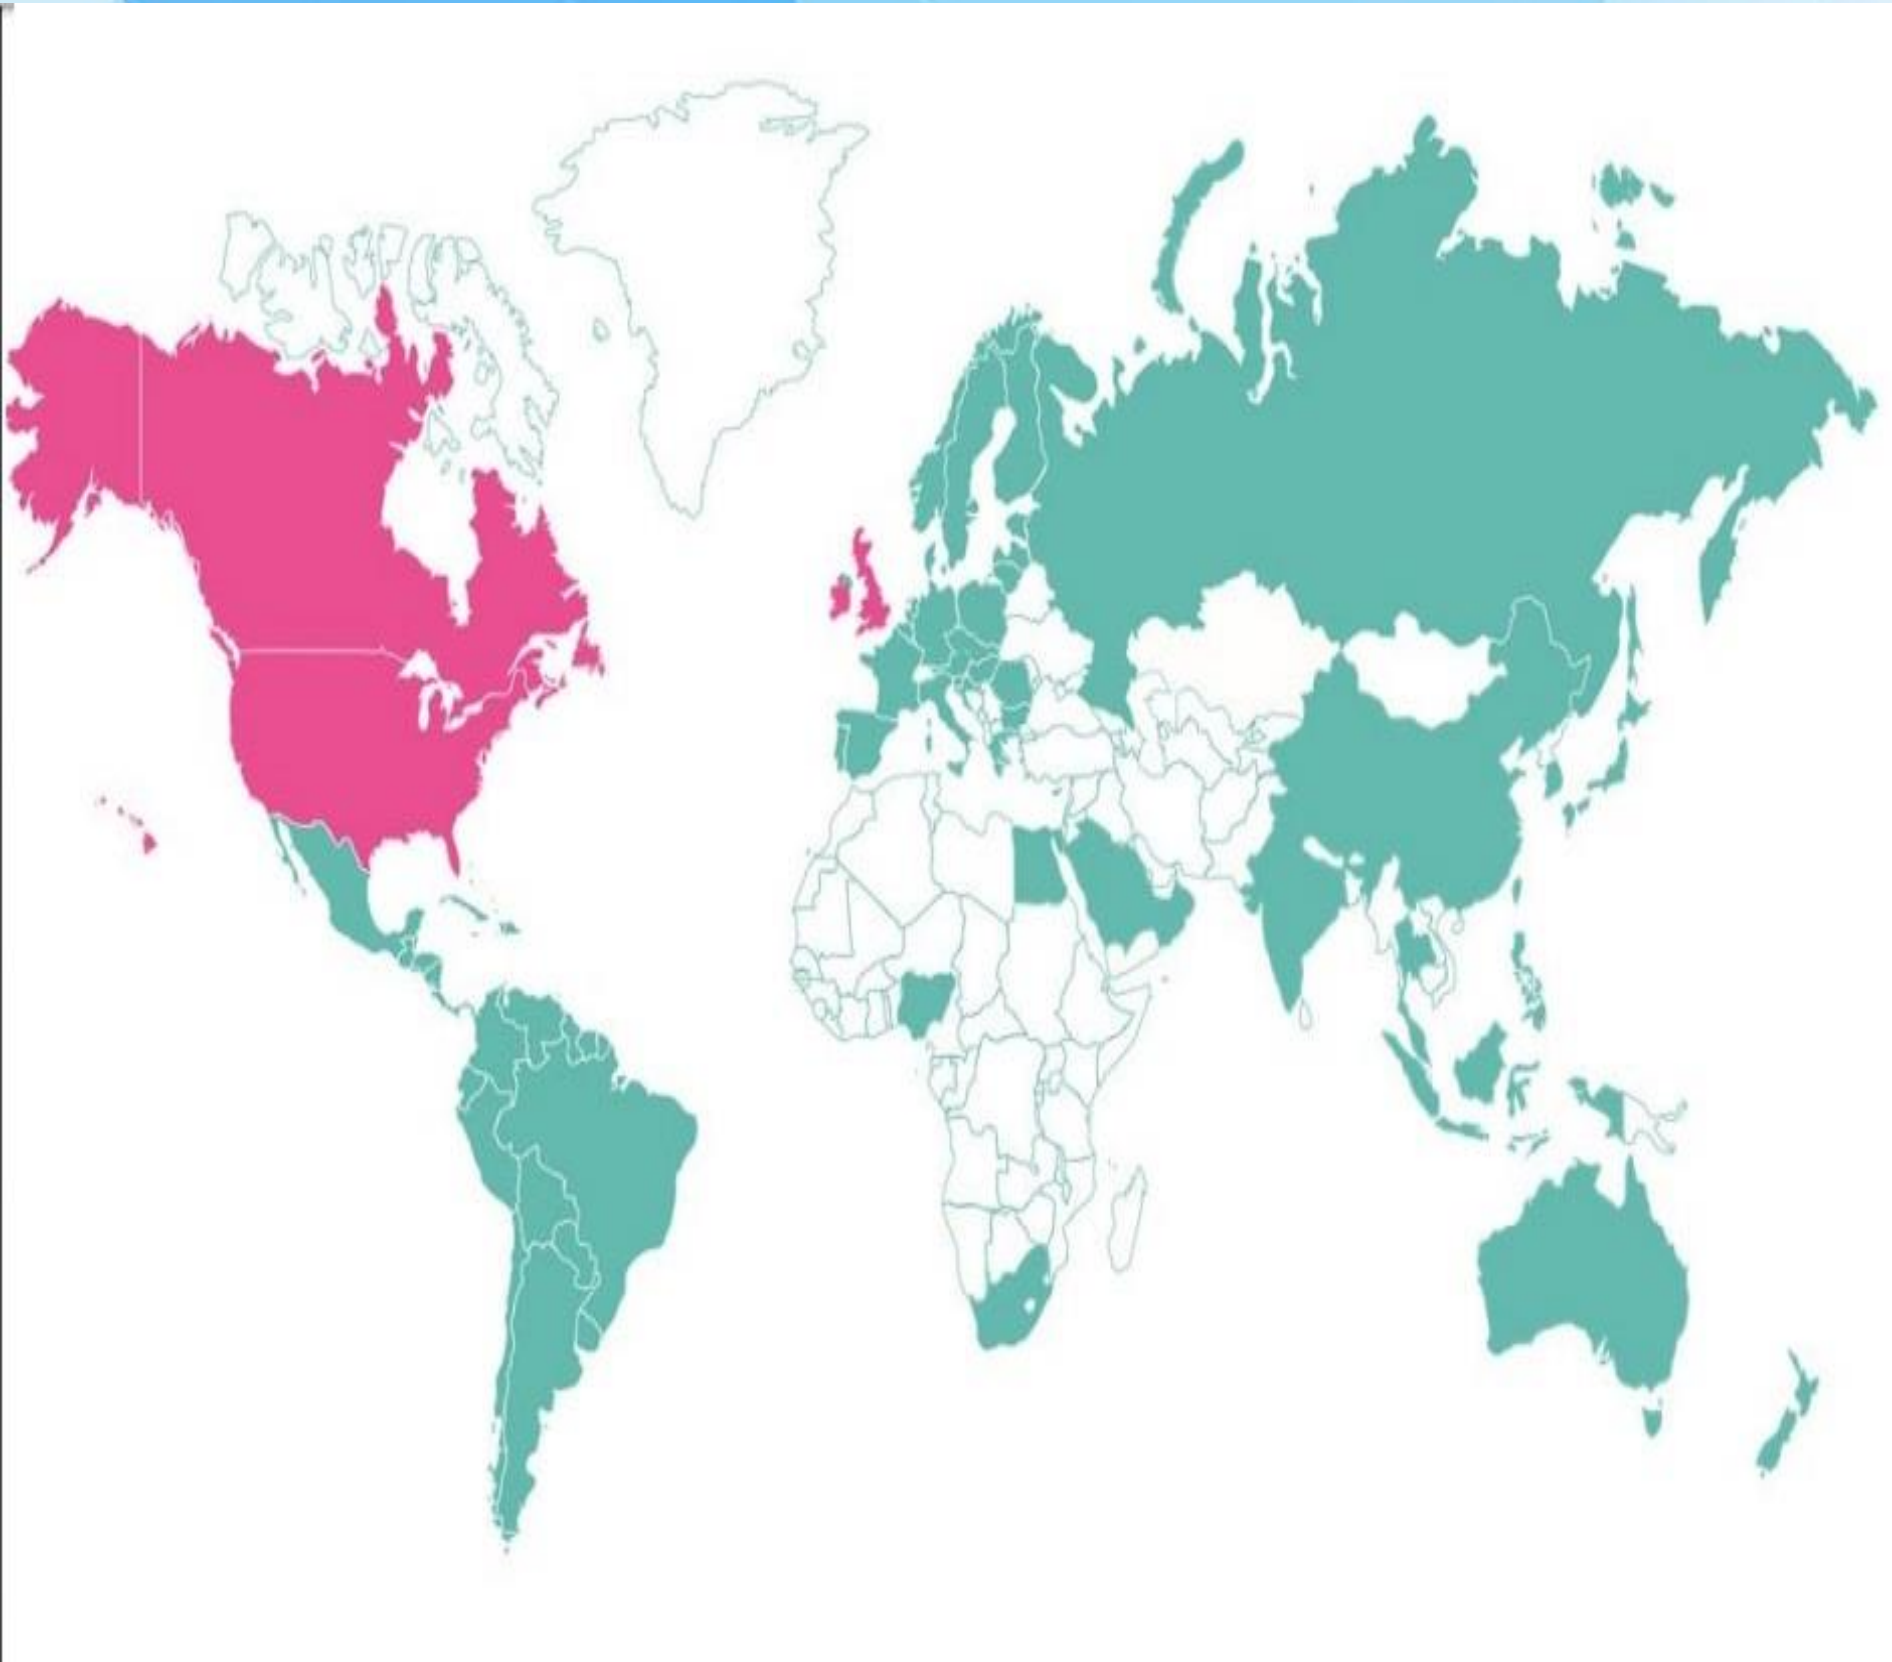

The panelist profiles are updated regularly. On the one hand, participants are asked to update existing data. On the other hand, new attributes are always added to the profile section to ensure the widest and deepest sample selection. Participants who have not responded to surveys in several months or who have not updated their data are deleted from our database. That we can accurately estimate the extent to which we can assist our clients with very specific requests.
